

## Economic Overview And Outlook: Connecticut

### JOBS

- Including January, the private sector has gained jobs nationwide for 23 consecutive months.
- In Connecticut, private sector employment fell by 7.5 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 3.3 percent.
- In Connecticut, employees in the construction, professional and business services, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Connecticut have experienced the greatest employment increases: education and health services; leisure and hospitality; and professional and business services.\*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

### EMPLOYMENT

- The unemployment rate in Connecticut was 8.0 percent in January 2012, up 3.1 percentage points from December 2007, but down from its most recent peak of 9.4 percent in December 2010.
- 152,000 Connecticut residents were counted among the unemployed in Connecticut during January 2012.

### EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 3rd quarter of 2011, total personal income is 0.2 percent below its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Connecticut was \$50,274.20 in the 3rd quarter of 2011, up from \$48,528.20 in the 3rd quarter of 2009.

### HOUSING

- After peaking in the first quarter of 2007, national home prices declined by 16.6 percent over 17 quarters. Between the second quarter of 2011 and the fourth quarter of 2011, the most recent quarter, national home prices have risen by 1.4 percent. In Connecticut, home prices fell by 15.5 percent over 17 quarters from their peak in the first quarter of 2007. Since the second quarter of 2011, home prices in Connecticut have risen by 1.3 percent.
- The median price of single-family homes in Connecticut was \$266,845 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 4th quarter of 2011, 5.1 percent of all mortgages, including 19.1 percent of subprime mortgages, were in foreclosure in Connecticut.
- Housing starts in Connecticut totaled 2,200 units (seasonally adjusted annual rate) in January 2012, a decrease of 23.3 percent from December.
- Within the Northeast census region, which includes Connecticut, sales of new single-family homes totaled 20,000 units in January 2012, an increase of 11.1 percent from December. Sales of existing single-family homes increased 4.2 percent to 500,000 units (at seasonally adjusted annual rates) from December to January 2012.

## How Does Connecticut Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Connecticut to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Connecticut since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Connecticut.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

### STATE QUICK FACTS

		Connecticut	United States
Unemployment Rates .....	January 2009	7.0%	7.8%
	January 2010	9.1%	9.7%
	January 2011	9.3%	9.1%
